Navigation basics

What navigation basics covers

A destination is a product area you open from a menu entry. The Accounting **Dashboard** is the Accounting entry point, and **Inventory Overview** is the Inventory entry point.

If you need to...	Go to
Open the Accounting destination	Find and open a destination
Open the Inventory destination	Find and open a destination
Understand the application shell	Understanding the interface
Work with the Accounting Dashboard	Accounting Dashboard
Work with Inventory Overview	Inventory Overview

Before you start

Prerequisites

Sign in before opening a destination. Your available menu entries depend on your permissions.

Before you start	What it affects
You are signed in	The product menu is available.
Your permissions include Accounting access	Dashboard is available under Accounting.
Your permissions include Invoicing access	Invoicing is available.

Find and open a destination

Use **Dashboard** for the Accounting entry point or **Inventory Overview** for the Inventory entry point.

Steps

1. Select the product menu.
2. Select the destination that matches your work:

If you need to...	Select
Open the Accounting entry point	Accounting , then Dashboard
Open the Inventory entry point	Inventory , then Inventory Overview

3. Confirm that the selected destination page appears.

After the Dashboard page appears, continue with [Accounting Dashboard](#).

After the Inventory page appears, continue with [Inventory Overview](#).

Result: The selected Accounting or Inventory destination is on screen.

Recognize the destination screen

Use the menu label to recognize the destination you opened. **Inventory Dashboard** is a separate Inventory menu entry.

Destination you opened	What to recognize
Dashboard	The Accounting entry point.
Inventory Overview	The Inventory entry point.
Inventory Dashboard	A separate Inventory menu entry.
