## Who uses Sherkety ERP

Choose **Accounting** or **Inventory** for the work you need to do.

## Who uses Sherkety ERP

Sherkety ERP brings several application areas into one application menu. An application area groups menus for one kind of work. The covered entries are **Accounting** and **Inventory**.

| If you need to...                             | Start with                                  |
|-----------------------------------------------|---------------------------------------------|
| Work with customer or vendor records          | <a href="#">Customers and Vendors</a>       |
| Work with journals or accounting management   | <a href="#">Accounting</a>                  |
| Read accounting reports                       | <a href="#">Reporting</a>                   |
| Work with inventory operations                | <a href="#">Operations</a>                  |
| Work with inventory products                  | <a href="#">Products</a>                    |
| Configure inventory or read inventory reports | <a href="#">Configuration and Reporting</a> |

For the wider set of application capabilities, see [What can you do with Sherkety ERP](#).  
For sign-in and first-day preparation, see [Your first day](#).

## Before you start

You need access to the relevant application area before its menus appear for your work.

### Prerequisites

| Area             | Access that controls its availability    |
|------------------|------------------------------------------|
| <b>Invoicing</b> | Accounting read-only or invoicing access |

| Area                                        | Access that controls its availability    |
|---------------------------------------------|------------------------------------------|
| <b>Inventory</b>                            | Inventory user or manager access         |
| <b>Accounting</b>                           | Accounting read-only or invoicing access |
| <b>Configuration</b> under <b>Inventory</b> | Inventory manager access                 |
| <b>Reporting</b> under <b>Inventory</b>     | Inventory manager access                 |

After you confirm your access, find the application area that matches your task.

## Find the right application area

The application menu is where you choose the application area that matches your immediate task.

### Prerequisites

- You are on the application-menu screen.

### Steps

- Choose the row in the table that matches your task.

| If your task is about...                                                   | Select            |
|----------------------------------------------------------------------------|-------------------|
| Customers, vendors, journals, accounting management, or accounting reports | <b>Accounting</b> |
| Operations, products, inventory configuration, or inventory reports        | <b>Inventory</b>  |

- Select **Accounting** or **Inventory**.

**Result:** You have selected the application area that matches your work.

After choosing an application area, review what the application menu provides.

Use [Navigation basics](#) for the next navigation steps after choosing an application area.

## Understand what the application menu shows

The application-menu screen is the starting surface for the covered application areas; it is not a record form or a work list.

**Note:** The application menu includes areas beyond **Accounting** and **Inventory**.

| What you look for         | What this screen shows                                                     |
|---------------------------|----------------------------------------------------------------------------|
| Application areas         | <b>Accounting</b> and <b>Inventory</b> are listed in the application menu. |
| Fields and grid columns   | No fields or grid columns are shown on this screen.                        |
| Messages                  | No message text is shown.                                                  |
| Dialogs and panels        | No dialog content is shown, and no panel or tab is expanded.               |
| Buttons and stage changes | No buttons or stage changes are shown.                                     |

The application menu also lists **Contacts**, **Sales**, **Purchase**, **Manufacturing**, and **Employees**. Those entries sit alongside the **Accounting** and **Inventory** areas.

For the broader shell, see [Understanding the interface](#).
