

Learning Path: Documentation Manager

August 25, 2026

About This Path

This learning path is for the **Documentation Manager** in Atloria. If you are responsible for documentation quality, structure, publishing, and ongoing upkeep across one or more projects, this path will help you build confidence step by step.

You will start with account access and basic navigation, then move into project setup, content work, version and review workflows, audience planning, screenshots, analytics, exports, technical documentation, and support agent features. This order matters because Documentation Managers usually need to understand how Atloria is organized before they can guide content, coordinate releases, and improve documentation across teams.

Prerequisites

Before you begin, make sure you:

- Have your Atloria sign-in details ready
- Can access the right Atloria workspace for your role
- Know which project or projects you are expected to manage
- Have permission to review project settings, versions, and publishing-related areas
- Are ready to follow the documents in order, especially if you are new to Atloria
