

Learning Path: Public Documentation Reader

August 25, 2026

About This Path

This learning path is for the **Public Documentation Reader** in Atloria. It is designed for people who visit published documentation to learn about a product, move through pages confidently, switch between versions, and read content meant for a specific audience.

You will start with the basics of finding your way around public documentation, then move into audience-specific reading, technical and reference content, and finally version-aware reading. This order matters because it helps you build confidence step by step: first understanding where things are, then learning how content changes based on audience, technical section, or version.

Prerequisites

Before you begin, it helps to:

- Have a link to a published Atloria documentation site
- Be ready to browse public pages in a web browser
- Know which product, version, or audience you want to read about, if that applies
- Start with a beginner mindset — this path assumes you are new to reading documentation in Atloria

You do not need admin access or project setup experience for this path.
