System Requirements

Use this page to confirm that your device and browser are ready for Atloria.

Supported browsers

Atloria works best in current versions of modern web browsers, including:

- Google Chrome
- Microsoft Edge
- Mozilla Firefox
- Safari

For the best experience, use the latest available version of your browser. Older browsers may load Atloria, but some pages or actions may not work as expected.

If you have trouble signing in or loading pages, first update your browser, then review [Signing In to Atloria and Solving Access Problems](#).

Internet connection

Atloria is used online, so you need a stable internet connection.

A faster connection is especially helpful when you:

- upload files
- generate documentation
- review analytics
- work with screenshots
- open large documentation projects

If pages load slowly or actions do not finish, check your connection before trying again.

Screen size and resolution

Atloria is designed for standard laptop and desktop screens.

Recommended minimum screen resolution:

- **1280 × 720**

Recommended for more comfortable use:

- **1440 × 900** or higher

A larger screen is helpful when you are writing, reviewing versions, comparing content, or managing project settings.

Supported devices

You can access Atloria from:

- desktop computers
- laptop computers
- tablets with a modern browser

Atloria can be opened on phones, but some work areas may be harder to use on a small screen. For tasks such as editing documents, managing approvals, reviewing analytics, or setting up projects, a desktop or laptop is recommended.

Browser settings

To use Atloria smoothly, make sure your browser allows:

- cookies
- JavaScript
- pop-ups for Atloria, if your browser blocks sign-in or download windows

If these settings are blocked, parts of Atloria may not open or save correctly.

Account access and setup

Before you begin, make sure you can reach Atloria and sign in with your account. If you are new to Atloria, start with:

- [Accessing and Registering Your Atloria Account](#)
- [Understanding Account Entry Points and Session Navigation](#)

If you are setting up your first project after signing in, see:

- [Creating Projects and Completing Onboarding](#)
- [Choosing Between Manual and Connected Project Setup](#)

Best experience

For the most reliable experience in Atloria:

- use an up-to-date browser
- use a stable internet connection
- work on a laptop or desktop when possible
- use a screen resolution of at least 1280 × 720

If your device meets these general requirements, you should be able to use Atloria for everyday documentation work.
