Where it refuses work

- `AtloriaCodeSample` stops the work with an early return when `match >= 0`.
- `AtloriaCodeSample` stops the work with an early return when `this.isMultipart`.

When something fails

- `AtloriaCodeSample` handles failure in 2 places: it turns it into a return value in 1, and discards it silently in 1. A failure discarded silently leaves no trace for whoever debugs this later.
