AtloriaRequestPanel

Kind: Class

Source: [atloria-monorepo/packages/ui-core/src/components/api-explorer/RequestPanel.ts](#)

Extends: `ExplorerElement`

Methods

Method	Signature	Returns
<code>connectedCallback</code>	<code>connectedCallback()</code>	<code>void</code>
<code>disconnectedCallback</code>	<code>disconnectedCallback()</code>	<code>void</code>
<code>updated</code>	<code>updated(changedProperties: Map<string, any>)</code>	<code>void</code>
<code>render</code>	<code>render()</code>	<code>void</code>

Properties

Property	Type
<code>styles</code>	<code>any</code>
<code>strings</code>	<code>ExplorerStrings</code>
<code>endpoint</code>	<code>APIEndpoint</code>
<code>environment</code>	<code>Environment</code>
<code>globalAuthToken</code>	<code>string</code>
<code>paramOptionsUrl</code>	<code>string</code>
<code>operationId</code>	<code>string</code>
<code>readerApiKey</code>	<code>string</code>
<code>schemas</code>	<code>Record<string, unknown></code>

Property	Type
presetValues	PresetValues

Where it refuses work

- `AtloriaRequestPanel` stops the work with an early return when `raw === undefined || raw === null`.
- `AtloriaRequestPanel` stops the work with an early return when `typeof raw === 'boolean'`.
- `AtloriaRequestPanel` stops the work with an early return when `typeof raw === 'object'`.
- `AtloriaRequestPanel` stops the work with an early return when `!this.endpoint`.
- `AtloriaRequestPanel` stops the work with an early return when `!source || !this.paramOptionsUrl || !this.operationId`.
- `AtloriaRequestPanel` stops the work with an early return when `Array.isArray(schema.enum) && schema.enum.length > 0`.

When something fails

- `AtloriaRequestPanel` handles failure in 3 places: it logs it and continues in 2, and discards it silently in 1. A failure discarded silently leaves no trace for whoever debugs this later.
