<code>generateStream</code>	<code>generateStream(prompt: string, options: GenerateOptions)</code>	<code>AsyncIterableIterator<string></code>
<code>analyze</code>	<code>analyze(content: string, type: AnalysisType)</code>	<code>Promise<AnalysisResult></code>

Properties

Property	Type
<code>name</code>	<code>string</code>

Where it refuses work

- `AzureResponsesProvider` stops the work with an early return when `isReasoningModel(this.model)` .

- `AzureResponsesProvider` stops the work with an early return when `data.type === 'response.completed'`.

When something fails

- `AzureResponsesProvider` handles failure in 4 places: it lets it reach the caller in 2, logs it and continues in 1, and turns it into a return value in 1.
