

# BenchmarkMonitor

September 4, 2026

## BenchmarkMonitor

Kind: Class

Source: `atloria-monorepo/libs/agent-core/src/benchmark/benchmark-monitor.ts`

### Methods

| Method                      | Signature                                              | Returns                          |
|-----------------------------|--------------------------------------------------------|----------------------------------|
| <code>close</code>          | <code>close()</code>                                   | <code>Promise&lt;void&gt;</code> |
| <code>analyze</code>        | <code>analyze(report: BenchmarkReport)</code>          | <code>FailureAnalysis</code>     |
| <code>formatAnalysis</code> | <code>formatAnalysis(analysis: FailureAnalysis)</code> | <code>string</code>              |

### Properties

| Property             | Type             |
|----------------------|------------------|
| <code>onEvent</code> | <code>any</code> |
| <code>log</code>     | <code>any</code> |

### Where it refuses work

- `BenchmarkMonitor` stops the work with an early return when `results.length === 0`.
