ChatFeedbackDto

Kind: Class

Source: atloria-monorepo/apps/api/src/project/dto/chat-feedback.dto.ts

Body for the PUBLIC chat feedback endpoint

(`POST /public/p/:slugWithId/chat/feedback`).

Anonymous 👍/👎 signal emitted from the support widget under a completed assistant answer. Persisted as a `chat_feedback` `InteractionEvent` on the shared analytics spine — no `ChatInteraction` row is created (the public stream doesn't mint one; the event IS the record).

Properties

Property	Type
<code>rating</code>	<code>'up'</code>
<code>sessionId</code>	<code>string</code>
<code>question</code>	<code>string</code>
