ContextManager

Kind: Class

Source: [atloria-monorepo/libs/agent-core/src/context/context-manager.ts](https://github.com/atloria-monorepo/libs/agent-core/src/context/context-manager.ts)

Methods

Method	Signature	Returns
add	<code>`add(item: Omit<ContextItem, 'turn'`</code>	<code>'tokenEstimate'> & { tokenEstimate?: number })`</code>
nextTurn	<code>nextTurn()</code>	<code>void</code>
getItems	<code>getItems()</code>	<code>ReadonlyArray<ContextItem></code>
getTurn	<code>getTurn()</code>	<code>number</code>
getTotalTokens	<code>getTotalTokens()</code>	<code>number</code>
shouldCompact	<code>shouldCompact()</code>	<code>boolean</code>
compact	<code>compact()</code>	<code>Promise<void></code>
clear	<code>clear()</code>	<code>void</code>

Where it refuses work

- `ContextManager` stops the work with an early return when `this.items.length <= minKeep` .
