FlowReshootRequestDto

Kind: Class

Source: [atloria-monorepo/apps/screenshot-worker/src/app/screenshot/dto/flow-replay.dto.ts](https://github.com/atloria-monorepo/apps/screenshot-worker/src/app/screenshot/dto/flow-replay.dto.ts)

Re-shoot ONE step of a recipe. The worker replays steps 0..(targetStepId-1) in a single context to reach the right screen, then re-captures only `targetStepId` — optionally at a new viewport / UI locale — and burns any per-step redactions into the fresh asset. Runs SYNCHRONOUSLY (no job row): the caller gets the fresh result back and the blob overwrites the canonical key, so existing drafts refresh.

`targetStepId` is a flowStepId: 0 = initial state; N = state AFTER the Nth step.

Extends: `FlowReplayRequestDto`

Properties

Property	Type
<code>targetStepId</code>	<code>number</code>
<code>viewport</code>	<code>ViewportDto</code>
<code>locale</code>	<code>string</code>
