FlowValidateRequestDto

Kind: Class

Source: [atloria-monorepo/apps/screenshot-worker/src/app/screenshot/dto/flow-replay.dto.ts](https://github.com/atloria-monorepo/apps/screenshot-worker/src/app/screenshot/dto/flow-replay.dto.ts)

Headless selector validation for a live tour: the worker walks the recipe in one context WITHOUT taking screenshots and reports, per step, whether the recorded selector still resolves — and when it doesn't, tries to HEAL it (xpath fallback, then an elementText/aria match rebuilt into a unique CSS path). Stored input values are never replayed (the api strips them).
