

GitHubWriteAdapter

September 4, 2026

GitHubWriteAdapter

Kind: Class

Source: [atloria-monorepo/apps/api/src/docs-pr/git-write/github-write.adapter.ts](https://github.com/atloria-monorepo/apps/api/src/docs-pr/git-write/github-write.adapter.ts)

Opens (or updates) a docs-fix PR on GitHub via the existing GitHub App installation token. Hand-rolled REST over axios to match the house style (no octokit in the repo).

Strategy: the head branch always carries exactly ONE commit off the base tip, so the PR diff is clean and a follow-up push simply force-updates that single commit — GitHub then updates the same PR (dedupe by head branch). Nothing merges automatically.

Extends: `GitWriteAdapter`

Methods

Method	Signature	Returns
<code>openOrUpdatePr</code>	<code>openOrUpdatePr(input: OpenOrUpdatePrInput)</code>	<code>Promise<OpenOrUpdatePrResult></code>

Where it refuses work

- `GitHubWriteAdapter` stops the work with `Error` when `baseRef.status !== 200`.
- `GitHubWriteAdapter` stops the work with `WriteNotPermittedError` when `!creds?.password`.
- `GitHubWriteAdapter` stops the work with `WriteNotPermittedError` when `res.status === 403`.
- `GitHubWriteAdapter` stops the work with an early return when `input.token`.
