

HookRegistry

September 4, 2026

HookRegistry

Kind: Class

Source: [atloria-monorepo/libs/agent-core/src/session/hook-registry.ts](https://github.com/atloria-monorepo/libs/agent-core/src/session/hook-registry.ts)

Methods

Method	Signature	Returns
has	has(event: HookableEvent)	boolean
run	run(event: HookableEvent, data: Record<string, unknown>, toolName: string)	Promise<HookRunResult>

Where it refuses work

- HookRegistry stops the work with an early return when `!hooks || hooks.length === 0`.
- HookRegistry stops the work with an early return when `result.blocked`.

When something fails

- HookRegistry handles failure in 3 places: it discards it silently in 2, and turns it into a return value in 1.
