KnowledgeFormatter

Kind: Class

Source: `atloria-monorepo/packages/doc-automation/src/v2/stages/stage-14-meta/knowledge-formatter.ts`

Methods

Method	Signature	Returns
<code>format</code>	<code>`format(reference: MetaCategoryReference</code>	<code>undefined, options: {</code>

```
maxChars: number;  
maxEntries: number;  
snippetTypes?: SnippetType[];  
groupByCategory?: boolean;  
})' | 'string' |
```

```
| formatDocList | formatDocList(reference: MetaCategoryReference | undefined, options: {  
maxEntries: number }) | string |  
| formatSnippets | formatSnippets(entries: KnowledgeEntry[], snippetType: SnippetType,  
maxChars: number) | string |
```

Where it refuses work

- `KnowledgeFormatter` stops the work with an early return when `!reference || !reference.entries || reference.entries.length === 0` , in 2 places.
- `KnowledgeFormatter` stops the work with an early return when `entries.length === 0` .
- `KnowledgeFormatter` stops the work with an early return when `options.groupByCategory` .

- `KnowledgeFormatter` stops the work with an early return when `!entries || entries.length === 0`.
