

# LexicalMdxExpressionNode

September 4, 2026

## LexicalMdxExpressionNode

**Kind:** Class

**Source:** [atloria-monorepo/packages/editor/src/plugins/jsx/LexicalMdxExpressionNode.tsx](#)

**Extends:** `DecoratorNode`

## Methods

| Method                        | Signature                                                                   | Returns                                         |
|-------------------------------|-----------------------------------------------------------------------------|-------------------------------------------------|
| <code>getType</code>          | <code>getType()</code>                                                      | <code>string</code>                             |
| <code>clone</code>            | <code>clone(node: LexicalMdxExpressionNode)</code>                          | <code>LexicalMdxExpressionNode</code>           |
| <code>getValue</code>         | <code>getValue()</code>                                                     | <code>string</code>                             |
| <code>getMdastType</code>     | <code>getMdastType()</code>                                                 | <code>MdxExpressionType</code>                  |
| <code>createDOM</code>        | <code>createDOM()</code>                                                    | <code>HTMLElement</code>                        |
| <code>updateDOM</code>        | <code>updateDOM()</code>                                                    | <code>boolean</code>                            |
| <code>importDOM</code>        | <code>importDOM()</code>                                                    | <code>DOMConversionMap</code>                   |
| <code>exportDOM</code>        | <code>exportDOM(editor: LexicalEditor)</code>                               | <code>DOMExportOutput</code>                    |
| <code>importJSON</code>       | <code>importJSON(serializedNode: SerializedLexicalMdxExpressionNode)</code> | <code>LexicalMdxExpressionNode</code>           |
| <code>exportJSON</code>       | <code>exportJSON()</code>                                                   | <code>SerializedLexicalMdxExpressionNode</code> |
| <code>extractWithChild</code> | <code>extractWithChild()</code>                                             | <code>boolean</code>                            |
| <code>isInline</code>         | <code>isInline()</code>                                                     | <code>boolean</code>                            |
| <code>decorate</code>         | <code>decorate(editor: LexicalEditor)</code>                                | <code>void</code>                               |

## Properties

| Property                 | Type                           |
|--------------------------|--------------------------------|
| <code>__value</code>     | <code>string</code>            |
| <code>__mdastType</code> | <code>MdxExpressionType</code> |
