

Logger

September 4, 2026

Logger

Kind: Class

Source: [atloria-monorepo/packages/doc-automation/src/v2/utils/logger.ts](https://github.com/atloria-monorepo/packages/doc-automation/src/v2/utils/logger.ts)

Methods

Method	Signature	Returns
setStage	setStage(stage: string)	void
clearStage	clearStage()	void
debug	debug(message: string, data: Record<string, unknown>)	void
info	info(message: string, data: Record<string, unknown>)	void
warn	warn(message: string, data: Record<string, unknown>)	void
error	error(message: string, error: Error, data: Record<string, unknown>)	void
stageStart	stageStart(stage: string, details: Record<string, unknown>)	void
stageComplete	stageComplete(stage: string, duration: number, details: Record<string, unknown>)	void
stageFailed	stageFailed(stage: string, error: Error, details: Record<string, unknown>)	void
tokenUsage	tokenUsage(stage: string, inputTokens: number, outputTokens: number, model: string)	void
child	child(prefix: string)	Logger

Where it refuses work

- `Logger` stops the work with an early return when `this.config.silent` .

- `Logger` stops the work with an early return when `!this.shouldLog(entry.level)` .
