McpManager

Kind: Class

Source: `atloria-monorepo/libs/agent-core/src/mcp/mcp-manager.ts`

Methods

Method	Signature	Returns
<code>connect</code>	<code>connect()</code>	<code>Promise<void></code>
<code>getTools</code>	<code>getTools()</code>	<code>ToolDefinition<any>[]</code>
<code>listServers</code>	<code>listServers()</code>	<code>string[]</code>
<code>close</code>	<code>close()</code>	<code>Promise<void></code>

Where it refuses work

- `McpManager` stops the work with an early return when `!config` .
- `McpManager` stops the work with an early return when `!fs.existsSync(this.configPath)` .
- `McpManager` stops the work with an early return when `'url'` in `config` .

When something fails

- `McpManager` handles failure in 1 place: it turns it into a return value in all 1.
