MdxGenerator

Kind: Class

Source: [atloria-monorepo/apps/cli/src/generators/mdx.generator.ts](https://github.com/atloria-monorepo/apps/cli/src/generators/mdx.generator.ts)

MDX Generator class

Generates MDX documentation from entities

Methods

Method	Signature	Returns
<code>generate</code>	<code>generate()</code>	<code>Promise<void></code>
<code>generateContent</code>	<code>generateContent()</code>	<code>Promise<{ pages: DocPage[]; navigation: NavItem[] }></code>

Where it refuses work

- `MdxGenerator` stops the work with an early return when `deploymentDiagram.nodes.length > 0`.
- `MdxGenerator` stops the work with an early return when `diagram`.
- `MdxGenerator` stops the work with an early return when `!this.options.includeRelationships || relationships.length === 0`.
- `MdxGenerator` stops the work with an early return when `!name || typeof name !== 'string'`.
- `MdxGenerator` stops the work with an early return when `parts.length > 3`.

When something fails

- `MdxGenerator` handles failure in 6 places: it turns it into a return value in all 6.
