NextjsParser

Kind: Class

Source: `atloria-monorepo/libs/parser-core/src/parsers/frontend/nextjs.parser.ts`

Next.js Parser

Pure TypeScript class that extends ReactParser to add Next.js-specific features.
No NestJS dependencies required.

Extends: `ReactParser`

Methods

Method	Signature	Returns
<code>parseFile</code>	<code>parseFile(filePath: string, content: string)</code>	<code>Promise<ParseResult></code>

Properties

Property	Type
<code>name</code>	<code>string</code>
<code>version</code>	<code>string</code>
<code>supportedPatterns</code>	<code>string[]</code>

Where it refuses work

- `NextjsParser` stops the work with an early return when `this.isRouteHandler(filePath)` .
- `NextjsParser` stops the work with an early return when `!content.trim()` .
- `NextjsParser` stops the work with an early return when `route === '/'` .

- `NextjsParser` stops the work with an early return when `/\/app\/page\.(tsx|jsx|ts|js)$/.test(filePath)` .
- `NextjsParser` stops the work with an early return when `route === 'index'` .
- `NextjsParser` stops the work with an early return when `match` .

When something fails

- `NextjsParser` handles failure in 2 places: it turns it into a return value in 1, and discards it silently in 1. A failure discarded silently leaves no trace for whoever debugs this later.
