RedactBoxDto

Kind: Class

Source: [atloria-monorepo/apps/api/src/capture/dto/create-flow.dto.ts](#)

A rectangular region (PERCENT 0-100 of the natural screenshot) the owner marked to be blacked-out. Unlike annotation overlays (coordinates only), a redaction is BURNED into the stored asset by the worker on the next (re)shoot — the underlying pixels are destroyed, so a leaked value can never be recovered from the image.

Properties

Property	Type
x	number
y	number
w	number
h	number
