RepairSsoDto

Kind: Class**Source:** atloria-monorepo/apps/api/src/platform/dto/repair-sso.dto.ts

Platform-admin SSO repair. Mirrors the writable fields of the self-serve upsert (SamlService.upsertConfig). `certificate` is optional — omit it to keep the stored cert (the read endpoint never echoes it back, only a fingerprint).

Properties

Property	Type
<code>ssoUrl</code>	<code>string</code>
<code>entityId</code>	<code>string</code>
<code>certificate</code>	<code>string</code>
<code>attributeMapping</code>	<code>Record<string, string></code>
<code>allowedDomains</code>	<code>string[]</code>
