ReshootStepDto

Kind: Class

Source: [atloria-monorepo/apps/api/src/capture/dto/update-flow.dto.ts](https://github.com/atloria-monorepo/apps/api/src/capture/dto/update-flow.dto.ts)

Re-shoot ONE step of a stored flow. The worker walks the recipe up to this step (in one Playwright context) and re-captures just its screenshot, optionally at a new viewport size / UI locale. Any redaction boxes stored on the step are burned into the fresh asset before upload.

Properties

Property	Type
viewport	ReshootViewportDto
locale	string
