

# SessionJournal

September 4, 2026

## SessionJournal

**Kind:** Class

**Source:** [atloria-monorepo/libs/agent-core/src/autonomous/session-journal.ts](https://github.com/atloria-monorepo/libs/agent-core/src/autonomous/session-journal.ts)

## Methods

| Method      | Signature                                                  | Returns                 |
|-------------|------------------------------------------------------------|-------------------------|
| add         | add(turn: number, type: JournalEntryType, content: string) | JournalEntry            |
| read        | read()                                                     | string                  |
| format      | format()                                                   | string                  |
| cleanup     | cleanup()                                                  | void                    |
| getGoal     | getGoal()                                                  | string                  |
| count       | count()                                                    | number                  |
| getAll      | getAll()                                                   | readonly JournalEntry[] |
| getFilePath | getFilePath()                                              | string                  |

## Where it refuses work

- `SessionJournal` stops the work with an early return when `fs.existsSync(this.filePath)` .
- `SessionJournal` stops the work with an early return when `this.entries.length === 0` .

## When something fails

- `SessionJournal` handles failure in 3 places: it discards it silently in all 3.
