

SyncNotPermittedError

September 4, 2026

SyncNotPermittedError

Kind: Class

Source: `atloria-monorepo/apps/api/src/git-sync/github-sync.adapter.ts`

Thrown when the customer repo cannot be written/read as the App — no installation covers

the repo, or the installation hasn't consented to contents:write. The mirror records this as status:'error' on the sync row and NEVER touches the repo.

Extends: `Error`
