UpdateFlowStepsDto

Kind: Class

Source: [atloria-monorepo/apps/api/src/capture/dto/update-flow.dto.ts](https://github.com/atloria-monorepo/apps/api/src/capture/dto/update-flow.dto.ts)

Owner edits to a captured flow's step list (F2 step-list editor).

The client sends the FULL desired ordered array — reorders, caption edits, deletions and redaction boxes already applied. The service re-sanitizes + re-redacts every value (defense in depth) and re-indexes `order` before storing, so a tampered client can never smuggle a secret back in.

Properties

Property	Type
<code>steps</code>	<code>CapturedStepDto[]</code>
