AtloriaProviderWrapper

Kind: Component

Source: [atloria-monorepo/apps/web/src/components/Providers.tsx](#)

Inner provider that uses the session. The token is exposed through a REF, not a closure over the session snapshot: on a hard navigation NextAuth resolves the session asynchronously, and a fetch started before that resolution must see the token the moment it arrives. The old closure captured `null` forever, so every full page load of data-fetching pages 401'd after the retry budget (the "No technical snapshot yet" bug on generated projects).

Props

Name	Type	Required	Default
<code>children</code>	<code>ReactNode</code>	✓	-
