SsoCompleteContent

Kind: Component

Source: [atloria-monorepo/apps/web/src/app/\(auth\)/sso/complete/page.tsx](#)

A1 SSO landing page. The API redirects here with a one-time `code` after a validated SAML assertion. We exchange it via the `sso-code` NextAuth provider (single use) which mints the standard session, then send the user into the app. The code is never a JWT — it only unlocks the already-minted token pair.
