/product/user-manuals — the manuals pillar. The wedge: the agent DRIVES the running app and captures annotated screenshots per release, per locale, with PII/secrets redacted — nobody records a human clicking. HONESTY: no video / screencast claims (we don't do video); no deflection-% claims; only the two validated headline scores (8.2 enterprise / 8.4 mid-market). Corporate 8.3 is structural-only — never headlined. Localization is one attribute, not the headline; Arabic/RTL is one peer among languages. Design matches /product/agent-actions: light + colorful, dark code panel for the receipt.
