

NORMALIZER_VERSION

September 4, 2026

NORMALIZER_VERSION

Kind: Constant

Source: atloria-monorepo/packages/doc-normalizer/src/lib/normalize.ts

Bump whenever the pre-pass, extension set, or serializer options change — every stored

document fingerprint is (content, NORMALIZER_VERSION)-keyed, so a change here is a corpus

re-normalization event, not a silent tweak. v2: CRLF/NFC pre-pass + YAML front-matter.
