TOOL_PROFILES

Kind: Constant

Source: [atloria-monorepo/libs/agent-core/src/tools/tool-profiles.ts](https://github.com/atloria-monorepo/libs/agent-core/src/tools/tool-profiles.ts)

Tool name sets per mode. `null` means all tools (full mode).

Note: `tool_search` is always included — it's the discovery mechanism for deferred tools. `journal` and `note` are always included for working memory.

Definition

```
Record<TaskMode, readonly string[] | null>
```
