

assessSpecQuality

September 4, 2026

assessSpecQuality

Kind: Function

Source: `atloria-monorepo/libs/parser-core/src/openapi/sdk-packaging.ts`

Spec-quality guard: SDKs are generated only for specs with at least one operation AND at least one component schema. Without schemas the generated packages are untyped stubs (every model is `object`) — worse than no SDK.

Signature

```
function assessSpecQuality(spec: unknown): SdkSpecQuality
```

Parameters

Name	Type
<code>spec</code>	<code>unknown</code>

Returns: `SdkSpecQuality`
