audienceSlugToScope

Kind: Function

Source: `atloria-monorepo/apps/api/src/project/audience-scope.util.ts`

Map a public audience slug to its doc-set scope.

'api' → 'api' (styled API reference set); 'technical' | 'developer' → 'technical' (code/entity reference); everything else → 'user' (end-user manual).

Signature

```
function audienceSlugToScope(audienceSlug: string | null): DocAudienceScope
```

Parameters

Name	Type
<code>audienceSlug</code>	<code>`string</code>

Returns: `DocAudienceScope`
