

autoEventOf

September 4, 2026

autoEventOf

Kind: Function

Source: [atloria-monorepo/packages/tour-widget/src/targeting.ts](https://github.com/atloria-monorepo/packages/tour-widget/src/targeting.ts)

WHEN an auto experience fires. 'load' (the default) shows on page-load/route change; 'click' / 'element-visible' / 'time-delay' defer until the visitor acts (the orchestrator wires the DOM listener/observer/timer). Beacon and launcher modes are user-initiated and never carry an autoEvent.

Signature

```
function autoEventOf(exp: WidgetExperience): AutoEvent
```

Parameters

Name	Type
exp	WidgetExperience

Returns: `AutoEvent`
