

buildAuthorizationUrl

September 4, 2026

buildAuthorizationUrl

Kind: Function

Source: `atloria-monorepo/packages/ui-core/src/components/api-explorer/oauth2.ts`

The URL to send the reader to. Throws rather than building a request that cannot succeed.

Signature

```
function buildAuthorizationUrl(request: AuthorizationRequest): string
```

Parameters

Name	Type
<code>request</code>	<code>AuthorizationRequest</code>

Returns: `string`
