buildExplorationPlan

Kind: Function

Source: `atloria-monorepo/libs/agent-core/src/autonomous/workflows/exploration.ts`

Build a codebase exploration plan.

Launches 3 parallel explorers that investigate the codebase from different angles, then synthesizes their findings into a unified understanding.

Signature

```
function buildExplorationPlan(options: {
  query?: string;
  workspace?: string;
}): OrchestrationPlan
```

Parameters

Name	Type
<code>options</code>	<code>{</code>
<code>query?: string;</code>	
<code>workspace?: string;</code>	
<code>}</code>	

Returns: `OrchestrationPlan`
