

# buildGeneratorArgs

September 4, 2026

## buildGeneratorArgs

**Kind:** Function

**Source:** [atloria-monorepo/libs/parser-core/src/openapi/sdk-packaging.ts](#)

Full argv for `java <argv...>` — the single source of truth for how the sdk-worker invokes the pinned generator jar (unit-tested without a JRE).

## Signature

```
function buildGeneratorArgs(options: {  
  jarPath: string;  
  language: SdkGeneratedLanguage;  
  specPath: string;  
  outDir: string;  
  packageBase: string;  
}): string[]
```

## Parameters

| Name                            | Type |
|---------------------------------|------|
| options                         | {    |
| jarPath: string;                |      |
| language: SdkGeneratedLanguage; |      |
| specPath: string;               |      |
| outDir: string;                 |      |
| packageBase: string;            |      |
| }                               |      |

**Returns:** `string[]`
