buildGifRefIndex

Kind: Function

Source: `atloria-monorepo/packages/doc-automation/src/v2/stages/stage-13-upload/video-directive.ts`

Map every GIF token ref (`<slug>--sNN` , the file basename without `.gif`) to its resolved CDN url, across all page manifests.

Signature

```
function buildGifRefIndex(manifests: Record<string, ManualVideoManifest>, resolveUrl: (relPath:
```

Parameters

Name	Type
<code>manifests</code>	<code>Record<string, ManualVideoManifest></code>
<code>resolveUrl</code>	<code>`(relPath: string) => string</code>

Returns: `Map<string, string>`
