buildMemoryExtractionPrompt

Kind: Function

Source: [atloria-monorepo/libs/agent-core/src/autonomous/session-memory.ts](https://github.com/atloria-monorepo/libs/agent-core/src/autonomous/session-memory.ts)

Build a prompt for a summarizer model to extract session memories.

This is designed to be sent to a model call. Domain layers can either:

1. Call their model provider directly with this prompt
2. Use a sub-agent with this as the task

Returns null if the session is too short to extract from.

Signature

```
function buildMemoryExtractionPrompt(ctx: SessionContext): string | null
```

Parameters

Name	Type
ctx	SessionContext

Returns: string | null
