

buildPagesManifest

September 4, 2026

buildPagesManifest

Kind: Function

Source: [atloria-monorepo/apps/api/src/docs-repo/sidecar.ts](https://github.com/atloria-monorepo/apps/api/src/docs-repo/sidecar.ts)

Build the pages manifest as a deterministic string. Pages are emitted sorted by path so the output is a pure function of the served set (no insertion-order dependence). Section order is PRESERVED (reading order carries meaning); screen slugs are sorted+deduped (a provenance set).

Signature

```
function buildPagesManifest(normalizerVersion: string, pages: PageIdentity[]): string
```

Parameters

Name	Type
normalizerVersion	string
pages	PageIdentity[]

Returns: string
