buildSetupInstructions

Kind: Function

Source: [atloria-monorepo/libs/agent-core/src/autonomous/setup-agent.ts](https://github.com/atloria-monorepo/libs/agent-core/src/autonomous/setup-agent.ts)

Build the system prompt / instructions for the setup sub-agent.

The returned string tells the agent exactly what to detect, in what order, and how to format its final output.

Signature

```
function buildSetupInstructions(workDir: string): string
```

Parameters

Name	Type
workDir	string

Returns: string
