classifyPersona

Kind: Function

Source: [atloria-monorepo/packages/doc-automation/src/v2/stages/stage-14-meta/generators/category-restructure.ts](#)

Classify a persona as admin or user based on name/description keywords.
Generic "manager" is NOT admin.

Signature

```
function classifyPersona(persona: { name: string; description: string }): PersonaClassification
```

Parameters

Name	Type
persona	{ name: string; description: string }

Returns: `PersonaClassification`
