collectEntities

Kind: Function

Source: atloria-monorepo/apps/api/src/technical-docs/curation.ts

Look up name/type for a set of entity ids in the UNCURATED navMap — the tree's "Hidden (n)" section needs names, but hidden entities are filtered out of the served map.

Signature

```
function collectEntities(navMap: NavMap | null | undefined, ids: string[]): Array<{ id: string;
```

Parameters

Name	Type
navMap	`NavMap
ids	string[]

Returns: `Array<{ id: string; name: string; type: string }>`
