

composeResolvedContent

September 4, 2026

composeResolvedContent

Kind: Function

Source: [atloria-monorepo/apps/web/src/components/change-requests/section-merge.ts](#)

Apply a list of per-section resolutions onto the current full document content, returning the composed `resolvedContent` to POST back.

Signature

```
function composeResolvedContent(current: string, resolutions: SectionResolution[]): string
```

Parameters

Name	Type
<code>current</code>	<code>string</code>
<code>resolutions</code>	<code>SectionResolution[]</code>

Returns: `string`
