composeRules

Kind: Function

Source: [atloria-monorepo/apps/api/src/reader-access/visibility.util.ts](#)

Compose a document's own rule with its category ancestor chain into ONE effective rule (all must pass). null when nothing in the chain has a rule.

Signature

```
function composeRules(rules: Array<unknown | null | undefined>): VisibilityRule | null
```

Parameters

Name	Type
<code>rules</code>	<code>`Array<unknown</code>

Returns: `VisibilityRule | null`
