computeActionSignature

Kind: Function

Source: `atloria-monorepo/libs/agent-core/src/autonomous/circle-detector.ts`

Compute an action signature from a set of tool calls.
Order-independent (sorted by toolName).

Signature

```
function computeActionSignature(toolCalls: Array<{ toolName: string; rawInput: string }>): string
```

Parameters

Name	Type
<code>toolCalls</code>	<code>Array<{ toolName: string; rawInput: string }></code>

Returns: `string`
