computeEntityImportance

Kind: Function

Source: atloria-monorepo/apps/api/src/technical-docs/search-index.ts

Per-entity importance 0..1 = blend of call-graph in-degree centrality (how many things reference it) and public-API-surface weight (its kind).

Signature

```
function computeEntityImportance(entities: GraphEntity[], relationships: GraphRelationship[]):
```

Parameters

Name	Type
entities	GraphEntity[]
relationships	GraphRelationship[]

Returns: Map<string, number>
