convertSpecToMapping

Kind: Function

Source: `atloria-monorepo/packages/doc-automation/src/v2/stages/stage-12-screenshots/spec-to-mapping-converter.ts`

Convert a single ScreenshotSpec into a ScreenshotMapping.

Translates captureType-specific metadata (modal, tab, form) into concrete action sequences that the screenshot capturer can execute.

Signature

```
function convertSpecToMapping(spec: ScreenshotSpec): ScreenshotMapping
```

Parameters

Name	Type
<code>spec</code>	<code>ScreenshotSpec</code>

Returns: `ScreenshotMapping`
