createApplyPatchTool

Kind: Function

Source: `atloria-monorepo/libs/agent-core/src/tools/apply-patch.tool.ts`

Create an `apply_patch` tool definition.

This tool accepts a patch in the Codex `apply_patch` format and applies it to the filesystem. It supports creating, updating, and deleting files in a single patch, with fuzzy context matching for reliable hunk application.

Signature

```
function createApplyPatchTool(options: ApplyPatchOptions): ToolDefinition<TContext>
```

Parameters

Name	Type
<code>options</code>	<code>ApplyPatchOptions</code>

Returns: `ToolDefinition<TContext>`
